- No capital investment & no software installation
- No transaction charges & near zero cost of ongoing use
- Free registration with accepted 'terms & conditions of use'
- Deploy within 60 minutes or less locally and/or globally

Buyer beware! Owner beware!
Consumer beware! Seller beware!

Fraud, theft, embezzlement and other illegalities, within B2B, C2B and C2C commerce, do not discriminate among its targets and victims. And, the '**can't happen to me viewpoint**' is myth. Mark Twain said it best,

"it's what you know for sure that just ain't so, that gets you into trouble".

So, are you currently using a simple 'purchasing through payment' **beware process** to attack and help prevent transactional crime within g-commerce™ & e-commerce?

If the answer is **NO**, why wait any longer? Take the unknowns out of your commerce now. Turn the "**beware cautionary warning**" into real action by digitally transforming and upgrading your sourcing, buying and payment process to **FocusedBuyer.com**.

We have designed, developed, programmed and delivered the **system solution** to your fingertips.

BETA USERS WANTED & VIRAL CROWDTRIALING™ IS APPRECIATED.
